

EXPERTS IN PATIENT HANDLING SOLUTIONS

RADIOLOGY RT POSITIONER – WASHABLE

This guide covers all products with the prefix RTP in the product code.

The **RT Positioner – Washable** takes the difficulty out of patient positioning for accurate laser precision in radiotherapy.

USER INSTRUCTIONS

1

Place the **RT Positioner** in the middle of the backrest of the breastplate (may need slight adjustment for some patients).

Let the handles fall down on either side.

Once the patient is lying on the plate, members of staff can then use the handles on the **RT Positioner** to finely adjust patients position so that markings can be lined up for laser measuring and for treatment procedures. This can be really precise.

2

3

Can be used by one or two members of staff depending on local protocols.

UNDERSTANDING THE RT POSITIONER

MATERIAL CONTENT

Outer: 100% Polyester
Handles: Polypropylene

STORAGE AND HANDLING

- Store in a clean dry environment that is not subject to excessive heat.
- Keep away from sunlight.
- Store flat and avoid placing heavy objects on top of the product.

WARNINGS AND PRECAUTIONS

- Do not leave or drop on the floor; it is a slip hazard.
- Test for slippiness before use. If over-laundered and doesn't slide please discard or replace.
- Inspect product (including handles) before use for signs of damage or tears.

CLEANING INSTRUCTIONS

- Wash as per laundry instructions.
- Can be wiped clean, between use with the same patient, with natural water and detergent or wipes that don't contain alcohol, solvents, bleaching or abrasive agents.
- Cleaning materials used should be patient safe and biodegradable.

DISPOSAL INSTRUCTIONS

- Non-recyclable
- Dispose of as clinical waste if it has been used by an infectious person.
- Otherwise dispose of through normal waste management.

Caution

Do not use if package is damaged

Storage Temperature Limit

Low

30-72°C

Wash at 30-74°C. Tumble dry on low heat. Do not Iron.
Do not use bleach. Do not use fabric conditioner.

HOSPITAL DIRECT (HD) ADDITIONAL SYMBOLS

At HD we understand that not everyone is familiar with all equipment, so to help therapists and healthcare professionals in assessing a product's suitability for a client, we have included two assessment tools, Functional Independence Measure (FIM) and Easy Guide Symbols. These will enable the healthcare professional to assess their client and decide whether or not a product will help the person based on their level of dependence and functional ability.

FUNCTIONAL INDEPENDENCE MEASURE (FIM) ASSESSMENT

Our FIM assessment guide for each product will help you decide the suitability of this product for the person's ability and need. Based on the standard criteria from Level 6 where the person can use the product unaided and unsupervised to Level 1 where all the assistance is provided by the carer and the client can do nothing, this guide is easy, quick and simple to use to check suitability against ability and circumstance.

FIM LEVELS QUICK GUIDE. SUBJECT VS CARER HELP

EASY GUIDE SYMBOLS

We use four symbols to indicate where a product is suitable and safe for the person to use unassisted, with a single carer or with multiple carers. These symbols indicate the minimum recommendation.

HD has a policy of continuous development and, as such, reserves the right to alter specifications (including measurements, materials and colours) without prior notice. If any serious incident has occurred in relation to the device it should be reported to the manufacturer and the competent authority in which the user and/or patient is established.
