Transatlantic Rollboards
at Guy's and St Thomas Hospital

CASE STUDY

www.hospitaldirect.co.uk

OBJECTIVES

In Autumn 2024, Dave Bennett, Southern Regional Manager for Hospital Direct, supplied Transatlantic Rollboards and delivered training to Guy's and St Thomas' NHS Foundation Trust in collaboration with their CT Practice Development & Education Lead.

Since then, the radiography team has reported a significant reduction in single-use slide sheet waste and notable improvements in patient handling efficiency.

Sustainable

Cost effective

STAFF BENEFITS

- Easy to use once they've had sufficient training
- Light to carry
- Fully flexible for small, medium and large patients
- Can bend with the bed
- Very smooth lateral transfer – lateral transfer with significantly less staff member is possible and easy
- Easy to clean

"Things are going very well with the Rollboards. Every radiographer I've spoken to is very happy with the introduction of the boards and can see the clinical, financial and environmental benefits."

— DAN HODSON - CT PRACTICE
DEVELOPMENT & EDUCATION LEAD

Client

Guy's and St Thomas
NHS Foundation Trust

CT Scans Department

PATIENT BENEFITS

- Very smooth lateral transfer
- No "bumps" as they transfer to the imaging table
- Money saved can be put into other NHS projects

FINANCIAL SAVING

- For CT areas alone £70k was saved by moving away from using disposable slide sheets
- Less strain on radiographers, presumed reduction in work-based manual handling injuries
